

THE MAKING OF

PBE Fuels deliver biomass products to customers across England and Wales. The company was set up in 2005 to focus on the emerging biomass industry. Initially, the idea was to work with farmers, who wanted to grow Miscanthus – elephant grass – as a source of biomass fuel. We diversified into wood pellet distribution in autumn 2008 when another biomass company found itself unable to fulfil its supply contracts to schools and other public sector organisations, which had recently installed biomass systems. Over the past 10 years, the business has expanded rapidly on all fronts. Our company ethos is Making Biomass Work, meaning that we deliver a high-quality product, efficiently and correctly to ensure your boiler keeps performing to its optimum level.
